The platform for wearables

Miniapps on your phone.
Captions, directions, and notifications
on your glasses.

Glassly is the platform. Partner hardware keeps its own identity.

A place in everyday life

More of the moment.

Conversations. A walk. An idea worth keeping.

Creative direction: show what people can do with Glassly.
Use real capabilities and clearly labeled examples.

Visual character

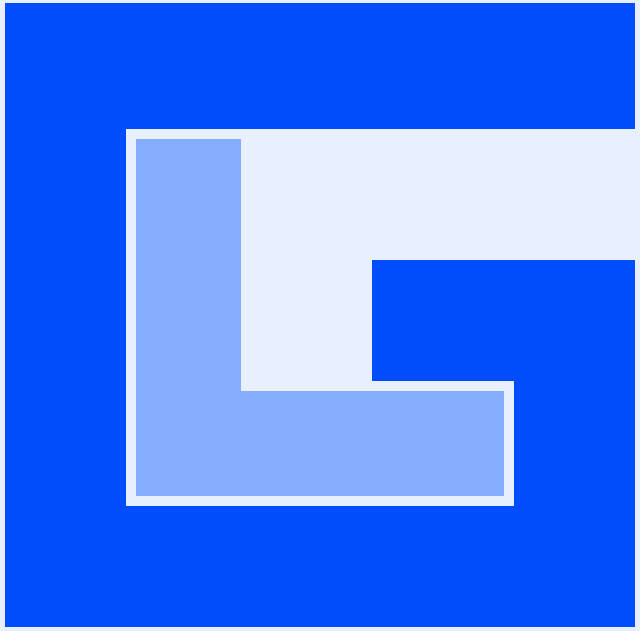

Space.
Clarity.
Presence.

Use large, undistorted product imagery and compact copy.

Build hierarchy with scale and spacing. Use regular text for controls.

Keep glass and grain subtle. Reserve motion for arrival and feedback.

The Glassly mark

Original artwork

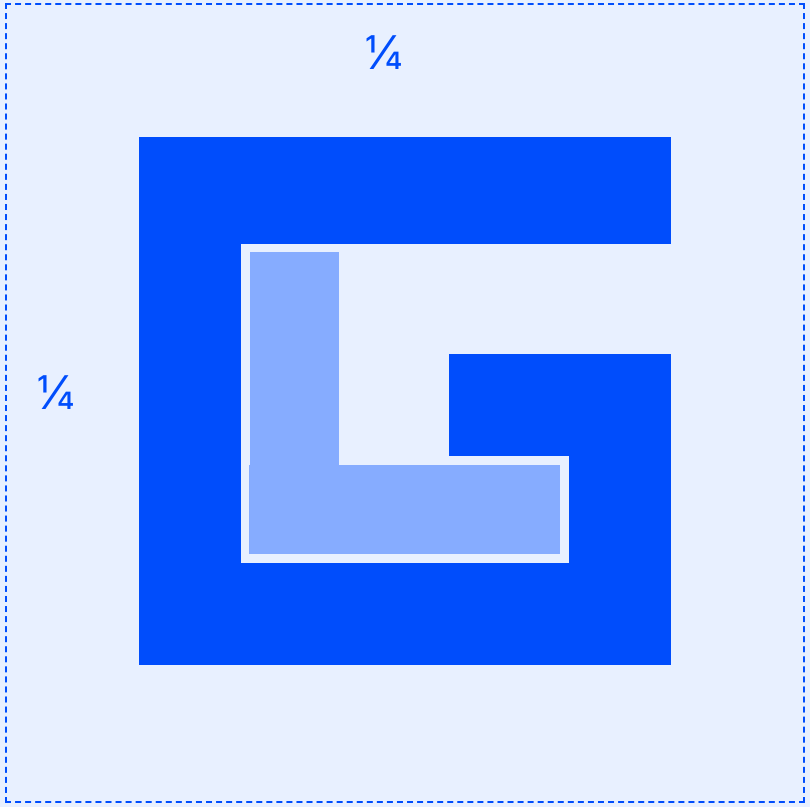

Use the supplied SVG at its original proportions and colors.

Keep the mark separate from partner logos and product imagery.

Avoid stretching, recoloring, outlines, or added effects.

The original SVG is the source of truth. Clear-space guidance follows.

Space around the mark

Room to remain recognizable

Proposed minimum clear space:
¼ of the mark width on each side.

Keep text, edges, and partner marks outside this boundary.

Proposed minimum digital size: 24px. Check legibility in context.

Logo in use

Mark and name

Standalone mark

Use original colors and proportions. Avoid effects on the logo itself.

Color palette

Cobalt	#004DFC	Primary actions and display emphasis
Accent blue	#86ACFF	Restrained accents and focus
Pale blue	#E8F0FF	Hero background
Paper	#F8FAFF	Main reading surface
Midnight	#061633	Demo background
Ink	#0B1D3D	Body text and labels

Color relationships

The platform for wearables.

Cobalt on pale blue

Useful things. In view.

White on midnight

Use cobalt for emphasis. Keep long passages in ink on a light surface.

Typography

Helvetica Neue

Light 300

Headlines and section headings.
Tracking no tighter than –0.04em.

Regular 400

Body copy, navigation, labels, and actions.
No medium or bold weights.

Web fallbacks: Helvetica, Arial, sans-serif. Light headings. Regular reading text.

Type scale

The platform for wearables.

See what moves into view.

Body copy
16px with 1.6 line height

Controls
14–17px, regular

Small labels
11–14px, high contrast

Hero: 48–80px desktop, 36–74px mobile. Section headings: 44px desktop.

Hierarchy without bold

The platform
for wearables.

Display / 300

Miniapps on your phone. Captions, directions,
and notifications on your glasses.

Body / 400

Scale and space separate the roles. Keep tracking at −0.04em or looser.

Product imagery

Large product cutouts, natural proportions, quiet backgrounds.

Shown with Even Realities G2

Caption examples stay outside the lenses. Label illustrative content clearly.

A caption, honestly shown

Sample caption

“Want to walk along the water?”

Keep sample text separate from hardware imagery.
Never imply that a marketing layout is an exact optical simulation.

Layout and rhythm

A wide product stage

Asymmetric hero copy

Short section introductions

Desktop uses narrow outer margins, generous image space, and compact text.

Mobile stacks heading, explanation, glasses, and actions.

Keep one primary action: Get early access. The demo is the secondary path.

Page sequence: hero, demo, devices, miniapps, developers, access, FAQ, footer.

One identity at every size

The platform for wearables.

The platform for wearables.

Miniapps on your phone.
More in view on glasses.

Get early access

Desktop gives the product width. Mobile preserves the reading order.

Surface treatment

Fine grain

Static texture at 3.5% opacity. It never captures pointer input.

Frosted details

12px backdrop blur on sample captions and demo controls, with opaque fallbacks.

Text remains crisp and readable.

Keep the main page surfaces quiet. Avoid broad glows and stacked glass panels.

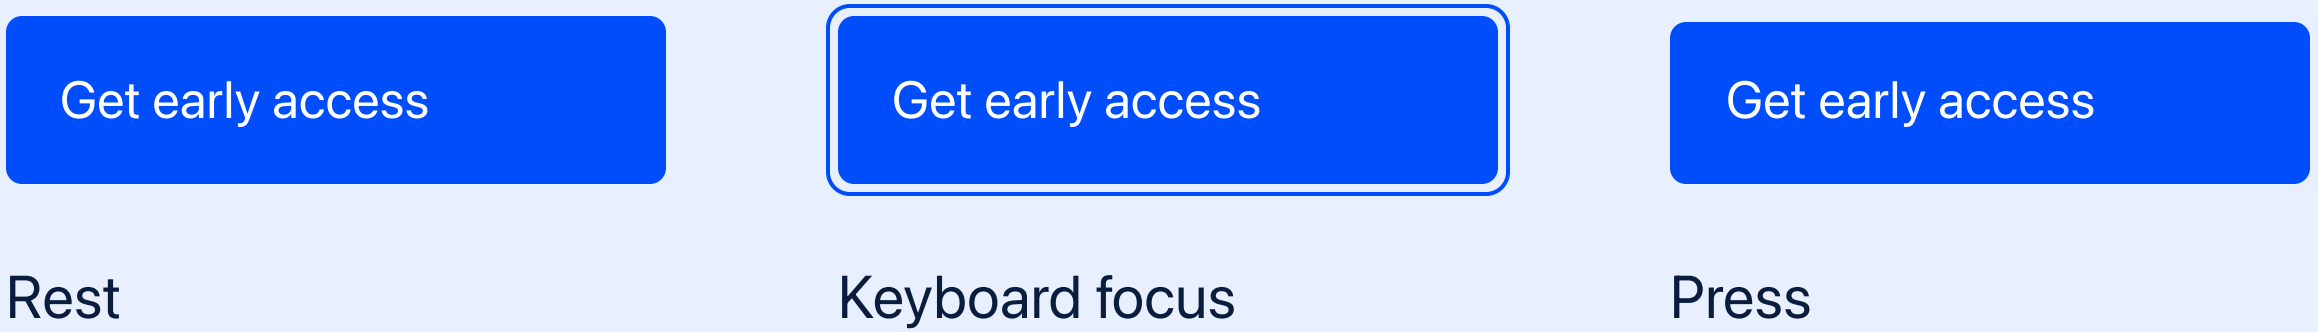

Motion and feedback

760ms

The glasses come into focus once.
Scale 0.96 to 1. Blur 3px to 0.

Controls respond in 120–300ms.
Reduced motion removes decoration.

Feedback that feels precise

Rest

Keyboard focus

Press

Visible focus is persistent.
Press feedback is brief: scale to 0.97, then return.

Static state specimens. Motion stops when reduced motion is enabled.

Voice and product names

Short, concrete, useful

“Get early access”
“Choose a miniapp”
“Start with your phone”

Glassly App
Glassly Miniapp SDK
Glassly Miniapp Store

Use “miniapp” as one lowercase word in running text. Do not use “GlasslyOS”.

Application · product announcement

Glassly

The platform for wearables.

Get early access

Proposed campaign layout. Keep one message and one action.

Implementation checklist

Existing logo and colors
Light and regular type
Real product imagery
Clear hardware attribution
Short section copy

Keyboard-visible focus
44px control targets where practical
Readable contrast and zoom
Reduced-motion support
No horizontal overflow
